LIM JOHERN

COMPUTER SCIENCE UNDERGRADUATE | MOBILE, WEB & AI DEVELOPMENT

Teluk Intan, Perak | +60 11-5688 9686 | johern20154@gmail.com | LinkedIn

OBJECTIVE

I am currently a final year Computer Science student seeking a 3-month (13 weeks) internship opportunity from 19th October 2026 to 16th January 2027 to apply my knowledge and skills in the professional service environment and gain experience in my field of studies.

EDUCATION

Bachelor of Computer Science (Honours) **Jan 2024 - Present**
Universiti Tunku Abdul Rahman (UTAR), Kampar
Expected graduation: January 2027

Foundation in Science **Oct 2022 - Jan 2024**
Universiti Tunku Abdul Rahman (UTAR), Kampar
Technological Science Stream

TECHNICAL SKILLS

- Python
- C++
- Java
- SQL
- JavaScript
- React
- Node.js
- HTML & CSS
- React Native
- Firebase
- OpenCV
- YOLO

PROJECT EXPERIENCE

MediSnap - AI Medicine Identifier & Tracker (FYP) **Mar 2026 - Sep 2026**
- Built React Native app with YOLO medicine identification.
- Integrated AI chatbot for medication guidance.
- Added reminders, authentication, real-time sync and push notifications with Firebase.

CharityLink Mobile Application **Mar 2026 - Apr 2026**
- Developed real-time chat with unread tracking and notifications.
- Integrated location-based discovery with Firebase Auth, Firestore and Storage.

Indoor Navigation System for Visually Impaired **Jul 2025 - Sep 2025**
- Built Python/OpenCV system to detect QR codes and identify locations.
- Implemented voice-guided directions using Microsoft SAPI.
- Used Dijkstra's algorithm for shortest-path routing and recalculation.

Street Food Explorer **Jul 2025 - Aug 2025**
- Developed a responsive web application for discovering street-food locations through an interactive map.
- Implemented search, category filtering, image galleries and a favourites feature.
- Used browser storage to preserve users' saved food locations and preferences across sessions.
